Distillate Intl Fundamental Stability & Value ETF	\$60	0.55%

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Fund's strategy is designed to include securities with attractive valuations, more stable than average long-term fundamentals and strong balance sheets, from a starting universe of roughly 1000 mid- and large-capitalization stocks listed outside the U.S. By avoiding stocks with excessive valuations or poor fundamental characteristics, the Fund aims to outperform a broad benchmark of international stocks over the long-term. During the period, the Fund benefited from strong global equity market returns, and the fund's returns outpaced the returns of the Morningstar Global Markets ex-US Index. Relative to that index, the Fund on average holds companies with more attractive valuation metrics such as Price/Cash Flow or Price/Earnings ratios.
